The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/594,841	<b>Applicant(s)</b> MIZUO ET AL.	
	<b>Examiner</b> Christopher R. Harmon	<b>Art Unit</b> 3721	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/27/09 has been entered.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3, 7, 16, 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kazumasa (JP7016956) in view of Pang (US 6,846,256).

Kazumasa discloses a process and apparatus for producing a bag with a mouth member by melt bonding the tubular mouth member 1 comprising preheating mouth member 1 by radiant heat and welding the mouth 1 to flexible bag films 2; see abstract, figures. It is not clear whether or not Kazumasa provides specifics during the process such as rotating mouth member 1 of thermoplastic resin (discussion of softening of the mouth member commonly known with thermoplastic resins; see abstract).

Pang teaches attaching mouth members to bottle containers comprising rotating tubular mouth members along their axes while heating (with radiant heat) to perfect a seal between the bottle container and the mouth member; see figures 1+.

It would have been obvious to one of ordinary skill in the art at the time of the invention to include rotating the tubular member of Kazumasa while heating as taught by Pang in order to evenly soften the material for the heat sealing process.

The mouth member rotator of Pang has supporting members 32 that slidably support mouth members (and bottles) and support member basal ends 40 considered capable for removably fixing the mouth member to support member; and driven unit 20; see figure 5.

Regarding claim 3, the bag is considered decompressed by sandwiching movement of sealers 4 and 5. It would have been obvious to one of ordinary skill in the art at the time of the invention to include evacuating/sucking air out of the bag during this operation in order to remove unwanted air from the bag interior.

### ***Response to Arguments***

4. Applicant's arguments with respect to all claims have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
